Confidential Patient Healthcare Summary

Patient Name	Suellen Silva
Doctor	Dr. Sarah Johnson
Specialty	Cardiology
Date	May 22, 2026

Diagnosis

The patient presented mild hypertension symptoms and intermittent chest discomfort. Initial ECG results were stable with no immediate signs of cardiac complications.

Treatment Plan

Recommended lifestyle adjustments including reduced sodium intake, daily exercise, and stress management. Prescribed low-dose antihypertensive medication for 30 days.

Doctor Notes

Follow-up appointment scheduled in four weeks for blood pressure monitoring and additional cardiac evaluation.
