Confidential Patient Healthcare Summary

Patient Name	Suellen Silva
Doctor	Dr. Michael Lee
Specialty	Dermatology
Date	May 22, 2026

Diagnosis

Patient diagnosed with mild contact dermatitis likely caused by prolonged exposure to cosmetic products containing fragrances.

Treatment Plan

Prescribed topical corticosteroid cream for 10 days and advised discontinuation of potential irritants. Daily hydration cream recommended.

Doctor Notes

Symptoms are expected to improve within one week. Patient advised to return if irritation persists or worsens.
